**Abstract of JP58178475**

**PURPOSE:** To print out a message on a receipt with a simple constitution by providing an electronic cash register with an area for storing numbers corresponding to plural messages, and adding a message if necessary. **CONSTITUTION:** When a department, quantity, unit price, etc., of article for sale are inputted on a keyboard 5, these are stored in an RAM 8 and processed under the control of a CPU 6 according to a program in an ROM 7 and they are displayed on a display 9 and printed out on a printer 10. The ROM 7 is stored with the numbers corresponding to the plural messages together with normal program, and a function key and numeric key are operated on the keyboard 5 to print a desired message, e.g. [10% discount for special membership] on a receipt. Consequently, the message is printed out on the receipt by the simple constitution to improve service.
